Skills

Languages: Java, JavaScript, TypeScript, SQL
Frontend: React.js, Tailwind CSS, HTML5, CSS3, Vite, Three.js
Backend: Node.js, NestJS, Spring Boot, REST APIs
Database & Tools: PostgreSQL, Prisma ORM, Git, Docker, Linux

Project

Voter Management System
Built a full-stack voter management platform with RBAC, MFA authentication, audit logging, and dashboard analytics using React, NestJS, Prisma ORM, and PostgreSQL.
<https://github.com/NithishSaravananRss/vms.git>

Immersive 3D Learning and Exploration Platform
Developed an immersive 3D educational platform for interactive and curriculum-driven learning with real-time exploration and spatial visualization using React, Three.js, and Node.js.
<https://github.com/NithishSaravananRss/immersive-3d-learning.git>

Maran Physio Care Website
Designed and deployed a professional healthcare website for a real client with responsive UI, business-focused design, and production-ready deployment for real-world usage.
<https://www.maranphysiocare.thirumarangroups.com/>

Developer Portfolio Website
Built and deployed a modern interactive portfolio featuring 3D particle animations, responsive UI, dark mode optimization, smooth transitions, and project showcase functionality using React, Vite, and Tailwind CSS.
<https://nithishsaravanan.me>

Valentine Proposal Web App
Created a cinematic interactive proposal web application with Firebase real-time tracking, GSAP animations, dynamic themes, and engaging celebration effects using React, Firebase, GSAP, and Tailwind CSS.
